DETAILED ACTION

1. Applicant's amendment filed on December 28, 2005 has been entered.
2. This application is in condition for allowance except for the following formal matters:

Drawings

3. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, (a) the claimed encoder in claim 24; (b) the claimed driving source in claim 1 (e.g., paper feed driving motor in the specification); (c) the claimed driving source in claim 25 (e.g., paper feed driving motor in the specification); and (d) the claimed lever restoring member in claim 20 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

The examiner has already faxed one set of proposed drawing corrections, proposed specification changes and proposed claim changes to applicant's representative (Mr. J. Randall Beckers, Reg. No. 30,358) for consideration.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate

changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

4. The disclosure is objected to because of the following informalities: (a) the encoder (e.g., encoder in paragraph [0057]) should be identified in the specification using a reference numeral, since it is a claimed element in claim 24; (b) the driving source (e.g., paper feed driving motor in paragraph [0026]) should be identified in the specification using a reference numeral, since it is a claimed element in claims 1 and 25; and (c) the lever restoring member (e.g., lever restoring member in paragraph [0052]) should be identified in the specification using a reference numeral, since it is a claimed element in claim 20.

Appropriate correction is required.

Claim Objections

5. Claim 1 is objected to because of the following informalities: (a) "storing position" on line 9 should be "storage position". While it is noted that line 10 of claim 1 has already been amended to address this problem, line 9 of claim 1 has not yet been amended to correct the same problem. Appropriate correction is required.

Conclusion

6. Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
